

The Rollout of Your New Perchwell MLS System

Are you ready for an update?

Yes. We are! Just like your home needs remodeled and sometimes gutted, so do our technology systems.

We've used Rapattoni for over 20 years as our MLS system, and they have been good. But, a coat of paint and new hardware cannot give us what we need and want. We need high performance and high efficiency.

As previously announced, Perchwell was selected as our new MLS system to meet the ever-changing and ever-evolving needs. The new system will be flexible, efficient, faster, and include more data fields. The interface and client communication are modern and the data and analytics will provide the information you need to operate efficiently!

We expect the implementation to occur in the December 2022 timeframe. You will receive a lot of information and training opportunities over the next several months. Please be on the lookout.
