

SELECTING THE CORRECT PROPERTY TYPE

When entering a listing into Rapattoni, selecting the correct property type is a critical first step. While the system defaults to **Residential** (for sale only), a full list of options, such as **Lease/Rent** or **Multi Family**, is available in the dropdown menu. It's important to note that once the listing has moved to the next step, the property type cannot be changed, making careful selection essential for a smooth and accurate listing process.

Enter New Listing

Step 1: Enter APN or Address Step 2: Verify

Please make your selections (*red indicates required field), then click "Place Pin on Map".

*Property Type Residential
