

# SQUARE FOOTAGE

CincyMLS works diligently to have accurate data. The county auditor is the official source for square footage. If the square footage is incorrect with the auditor, the MLS can be updated under the following conditions:

- The seller may contact the auditor to request corrections to their record. Once they agree to the correction, submit the approval email to MLS.
- Builder plans or blueprints (with the finished square footage labeled and the work completed) can be sent to MLS to review.
- The square footage can be changed to "0" in MLS and the information can be included in the marketing remarks.

*Changes to square footage can only be made by MLS staff.*
