

RAPATTONI MLS 11

The new Rapattoni MLS 11: View & Act Interface was launched on November 5. The sleek new search results page has been designed to minimize extra clicks and streamline work.

Until **December 10**, users can switch between the Legacy View and the new View & Act Interface, as Rapattoni will be retiring the Legacy View after this date.

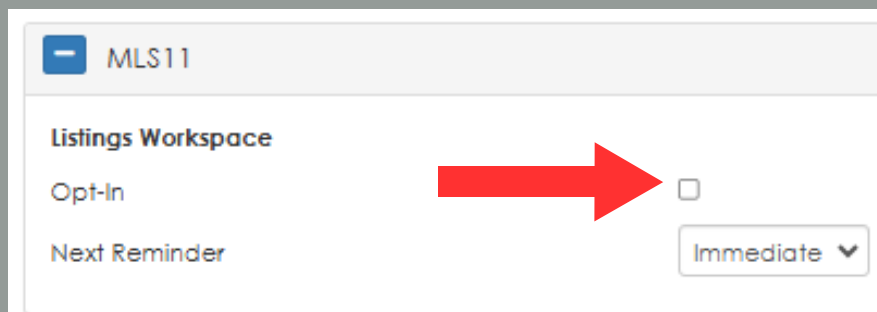

From the search results page, click the Legacy View in the upper right corner to quickly return to the old view.

To return to the View & Act Interface from the search results page, click the MLS11 button at the top middle.

At any time through December 10, opt in or out through **Your Preferences** under **Admin** in the top toolbar and scrolling to the bottom.

With an organized layout and intuitive, user-friendly tools, key features like viewing options and tasks are prominently displayed and easily accessible, minimizing the time required for routine tasks.
