

BEST PRACTICE

Check Closing Information in MLS

CincyMLS strives to have the most timely, updated and accurate data. It's imperative that the sold information is verified by both the listing and selling agent after the status is changed to Sold.

We request that any errors be reported as soon as possible so staff can update the information in a timely manner. Policy is that changes must be made within 30 days. Beyond 30 days, staff will only modify information that is impactful to comparable data.
