

IDENTITY SHARING

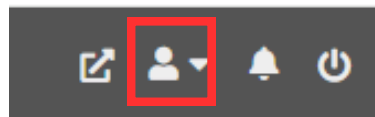

Sharing MLS credentials violates CincyMLS Rules and Regulations; however, Identity Sharing can be a solution. Identity Sharing allows a licensed or unlicensed user to work on a licensee's behalf.

HOW IT WORKS

The broker/manager and subscriber whose account is being shared use the Identity Sharing Application to authorize the applicant to work as the licensee. The applicant must have their own credentials to access CincyMLS.

From CincyMLS.net, choose Compliance & Forms in the menu bar, select MLS Forms, then Membership Forms. Complete the Identity Sharing Application and submit to Support@CincyMLS.com.

Once the application has been received, CincyMLS will update the access. The applicant will be able to choose to work as the licensee by opening the 'Work As' icon on the right side of the toolbar in Rapattoni and choosing the licensee.

Note: The Broker assumes responsibility for the applicant to abide by the MLS Rules and Regulations. The licensee (Sharer) is responsible for disabling and removing the applicant as a sharer if the relationship is dissolved.

There is no additional charge for this access.
